

Experts in Bottle Cleaning Machinery, Engineering and Fabrication Services

4-BELT UNSCRAMBLER

The 4-Belt Unscrambler is the ultimate solution for single filing bottles. Three progressively moving belts separate bottles, while the 4th reverse belt prevents jamming by removing excess bottles. It can be sold in conjunction with one of our bottle cleaners or sold separately to integrate into an existing bottling line.

Special Features

- Single Files and Eliminates bottle transfers
- 4th reverse belt prevents jamming of bottles and recirculates them back into queue
- Customizable to nearly any desirable length, including an L-shaped dump table for manual loading
- Type 304 Stainless Steel construction with FDA approved plastics
